### G2CHE

#### Unit 2 Wet Feet

In this unit, students investigate how chemistry plays an important part in their daily lives. Students appreciate the role of chemistry in contributing to a sustainable future by investigating recycling and disposal of community chemical wastes. They investigate ways that chemists assist in protecting the natural environment, such as conservation and management of our resources. They perform experiments to investigate reactions with acids and bases and use chemical aids, such as pH colour charts. They plan and conduct investigations to collect first-hand data safely and methodically.
